Reviews from users Kaieh Barbour: ALLOW KEYBOARD INPUT, I have played desktop for a long time and was excited to play the mobile version but am continually disappointed with the controls. It would be so easy to allow input from a bluetooth keyboard or something. It would make the game playable and enjoyable (other than the constant bundle ads).Minorator Gaming: Tanki Online is a very great game and I just remembered it when I saw a notification of it, the floating hulls are way to OP on mobile the fact i can move left and right so i can dodge long range attacks feels way to easy and you can also do circles around object with no problem. My only concern is on occasion, I will come into a problem when I try to launch the game and the update screen comes up, usually this wouldn't happen as I have auto update on, so I press it and there's no update.Austin M. Deleon: IT COULD BE BETTER but except there are two problems, y'all need to fix the sound and the match making because every time I when it seems like there's a match about to start and the time remaining is 1 sec it freezes and I would have to wait longer for it to load or I would have to restart the whole app. I have nokia and it's built for video games but its to a point where I feel self conscious about what apps I put on my phone , I don't have Tanki to be one of them.A Google user: Easily my favorite game ever, I played on PC, but when I switched to mobile, I was afraid the controls would be bad. I was mistaken, very good controls. I don't spend money on games, but the in app purchases are actually affordable. Oh yeah, could you guys remove the power ups or just make them have a longer cool down? they are my only gripe. Anyways, keep up the good work, producers!?A Google user: Really good game on the computer, and a more than successful adaptation to mobile. Every single sweet feature is included in an easy-to-use format. Incredibly fun game, with steady and satisfyingly paced progression. You can find your own style and try out every other possible style for funnies. Fantastic, balanced gameplay where you have a real chance against any player, even one ranked much higher than you. Awesomely made, user friendly, and No Ads - and you dont have to watch any to progress!A Google user: tanki online mobile shouldn't cross platform with pc because the controls are difficult and in the pc is easier to control your tank , and also I feel like there should be an adjustment feature where you can customize the controls yourself to move the shooting button to any part of the screen you want , but overall it's a great game and graphics.A Google user: hard to control, hard to move and shoot at the same time, good game but not for mobile gaming, but i think it would be nice to see a feature when you want to play with mobile gamers or pc gamers, mabey a button. it has been a good 5 years since i have played this game, it will all ways be in my heart, but will only get 3 stars until the pc v mobile options are improved.A Google user: The game is great but there's just one thing that ruins it for me: Druggers, people won't stop using their supplies and at least 60% of the people I go up against has the speed boost, double armor, and double damage, everytime I bring their health down to at least a fourth, they either use overdrive or their repair box. Maybe if you can limit the amount of supplies you can use per match, it would be great. But for now, I'm leaving 3 stars.A Google user: Tanki used to be a great game. But that was years ago. They added updates that made the game worse. Specifically, the battle list and paint updates. Battle list is terrible and it makes it impossible to select the specific game mode you want to play, dropping gold boxes for people is no longer possible because you can't share battle link with fellow tankers on chat. Paints no longer provide armor against turrets and you can now buy them at any level. Pointless and terrible updates if you ask me.A Google user: Great design and aesthetics. The graphics and speed is great. The garage is nice with details about turrets and the chart. However the controls are hard to use and driving is difficult the tank always fully rotates even if the joystick is slightly turned. It is hard to get the same precision as with a keyboard. I would be nice to know about missions and experience progress within battles. Anyway the turret camera should turn as the turret turns like the pc version when using keyboard however still keep the same easy turning and thank you for fixing the other issues Full thanks to Alterniva platform for all the work put in to make TO, TX and Tanki Mobile Keep up the Awesome work Tanki Online - PvP tank shooter v1643204761 (43Mb)
